JOB MARKET PAPER

“Unforeseen Events or Unscrupulous Officials? Electoral Accountability and Law Abuse in Public Procurement” (with [Serkant Adiguzel](#) and [Murat Koyuncu](#))
[Draft available soon]

Abstract: This paper examines whether electoral accountability deters public officials from abusing the law using a novel indicator of law abuse based on the use of *unforeseen event clause*: a typical clause in procurement regulations granting officials with more discretion at times of *force majeure* events. Exploiting a natural experiment and applying a staggered Differences-in-Differences (DiD) design, we find that public officials who lack reelection incentives are 24 percentage-points more likely to abuse the unforeseen event clause than those who face reelection incentives. The unjustified use of unforeseen event clause in turn inflates contract prices by 23% and reduces value for money by 40%. These results are robust to various specification checks, including a Regression Discontinuity in Time (RDiT) design. We rule out the possibility that the documented effects are driven by better quality procurement through increased discretion. We, however, find no evidence of electoral accountability deterring more subtle malpractices such as cost manipulation.
